

The MWG vision:

We foster our skills - this is where I can set goals for myself.

The MWG promotes a climate that appreciates and fosters achievement. Here I can develop my skills and interests in the best possible way, and become more confident and independent.

In providing comprehensive education, the MWG offers its pupils the support needed to plan their future and realize their goals.

We take into account the various skills needed to study successfully and start a fulfilling career. I am being encouraged to actively shape the present and the future in the school environment, in extra-curricular activities and in my personal life.

Thus, I learn to take responsibility for myself and to set personal goals.

We value diversity - this is where I am respected.

People from all over the world meet in our school and share their different experiences. We appreciate this diversity and strive to develop curiosity and openness for unfamiliar perspectives.

In doing so, I find my identity and develop an understanding for others.

We esteem each other and respect different points of view. We maintain a fair and open culture of conversation. We discuss different opinions, and courageously search for solutions to agree on.

Thus we learn to take responsibility for others.

We are shaping a vibrant school community - this is where I belong!

We create mutual trust. We acknowledge personal commitment and constructive participation. We appreciate success in everyday life and in the school environment. For that we create transparent communication channels for educational and organizational affairs.

Thus I learn to take responsibility for our community.
